

Bilingual Forum Ireland

Bilingual forum Ireland is a new project that aims at raising awareness about bilingual issues in Ireland. The main objective of the project is to provide free information for parents and educators about issues concerning bilingual language acquisition and education.

We organise free workshops for families and we provide an online forum for questions and discussions on bilingualism. Some of the topics of our workshops are:

- The multilingual family
- The benefits of bilingualism
- Bilingualism and bi-culturalism
- Bilingualism at school
- Bilingualism and integration
- Acquiring the Irish language in the early years

For more information or to book a place in our next workshop contact
